

Careers in Science and Health

Find out all about careers in science and health in this interactive workshop. The session will encourage students to think about the huge range of careers in science and health, what they involve, and how to match their skills and interests with their choice of subjects and careers. We aim to have a STEM Ambassador and/or a medical or dental student in every workshop. Students will work in small groups and some activities will be self-led.

Running time: 60 minutes

Maximum group size: 30

Suitable for: Year 9 – Year 13

Please note that this session can only be delivered on site at Centre of the Cell

This workshop includes the following activities:

1. Meet a scientist (if available)
2. Meet a medical / dental student (if available)
3. Mystery object round – discover the wide range of careers available in science and health
4. Personality profiles - thinking about how different careers suit different personalities
5. Making the most of work experience – exploring transferable skills
