

Invasion! Infection and Immunity

Take a tour of the immune system in our 'Invasion! Infection and Immunity' workshop. You'll discover how pathogens invade your body, find out the difference between bacteria and viruses, learn how your body defends itself and take part in an immune system obstacle course!

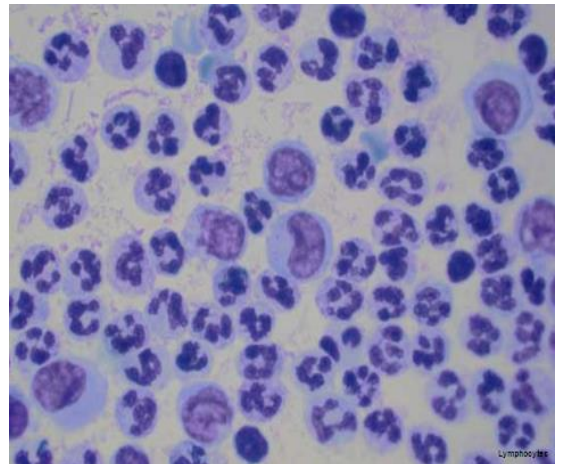

The following 20-minute modules can be added onto the workshop at an additional cost:

1. Vaccination (£25 extra)
2. Allergy (£25 extra)
3. Antibiotic Resistance (£25 extra)

Running time: 60 minutes to 120 minutes, depending on module selection.

Maximum group size: 35

Suitable for: Year 12 & Year 13

'Invasion! Infection and Immunity' includes sections on the following:

1. Pathogens – Bacteria, Viruses, Fungi and Parasites
2. The innate immune response – external and internal defences
3. The active immune response – B cells and T cells
